

Figure S1.

Performance errors for a missed putt. Radial error ("R", in cm): hole to ball (stop) distance. Angle error (" θ ", in degrees): absolute value of the angle between the ball (start) to hole and the ball (start) to ball (stop) lines. Length error ("L", in cm): absolute value of the ball (start) to hole distance minus the ball (start) to ball (stop) distance. All errors were 0 when the ball was holed.
